ASSEMBLY

NOTE: The ladder arrives pre-assembled. The only assembly needed is to bolt the hand supports to the ladder.

Step 1. Ensure the safety labels on the hand support arms face the outside.

Step 2. Place each bushing (B) inside of the openings of the hand support arms. SEE FIG. 1.

Step 3. On either side, insert a carriage bolt (A) into the inside hole of the ladder (FIG. 2), add a plastic washer (FIG. 3) and pass the bolt through the hand support arm.

FIG. 1.

FIG. 2

FIG. 3.

Note: In order to get the bolt to go all the way through the support arm and ladder, the square area of the bolt head must be turned until it fits into the square area of the hand support arm.

Step 5. After the bolt is completely through the hand support arm and ladder, place the metal washer (C) on the bolt. SEE FIG. 4.

FIG. 4.

Step 6. Attach a locking nut and tighten. The bolt and locking nut should be tightened to the point the hand support arm and ladder are tight enough that allows the ladder and arm to swing apart. If the ladder does not swing apart from the arms with ease, the bolt/lock nuts are over-tightened. SEE FIG. 5.

FIG. 5.

Two D clips are included. Once the ladder is attached to the side rub rails of a trailer, the D clips are used to secure the ladder to the trailer.

Two C-brackets and pins are included to secure the ladder in place during transportation. SEE FIG. 6.

Instead of D clips, a customer provided padlock can be used to secure and lock the ladder to the trailer.

FIG. 6.
