

# ADJUSTABLE TRAILER WHEEL RISERS

When loading docks are uneven, gravity works against your team when unloading and loading cargo. Eliminate the safety hazard by implementing these aluminum risers at your dock. With lighter construction than other manufacturers (whose risers can weigh up to 300 lbs.) and an adjustable height design, you'll be able to replace all fixed risers from 5" to 12".

Sold in pairs, each set of two supports up to 40,000 lbs. and has serrated rungs built into the surface for maximum traction in inclement weather as well as icy conditions. Four stainless steel handles per riser provide hand grips for manually repositioning.

## FEATURES & BENEFITS

- High-strength, lightweight aluminum
- Levels trailers off at dock for easier, safer loading and unloading
- Four sizes accommodate single/tandem axles and single/dual wheel applications
- Adjusts in 1" increments from 5" H to 12" H
- 40,000 lb. weight capacity per pair
- Serrated rung surface for maximum traction; four stainless steel handles per riser
- Sold in pairs; patent pending

Part Number	Length	Width	Weight (ea.)	Axle/Wheels
S-40-18-066-RISER	66"	18"	79 lbs.	Single/Single
S-40-27-066-RISER	66"	27"	112 lbs.	Single/Dual
S-40-18-090-RISER	90"	18"	103 lbs.	Tandem/Single
S-40-27-090-RISER	90"	27"	147 lbs.	Tandem/Dual
